RAYMOND WEIL

GENEVE

INSTRUCTIONS FOR USE

SELF-WINDING MECHANICAL WATCH WITH
TRI-COMPAX CHRONOGRAPH FUNCTION

INTRODUCTION

Congratulations on your choice of a watch from the RAYMOND WEIL collection, a dynamic expression of masterful design and the constant objective of Swiss-made quality that have been the hallmarks of the brand since its creation.

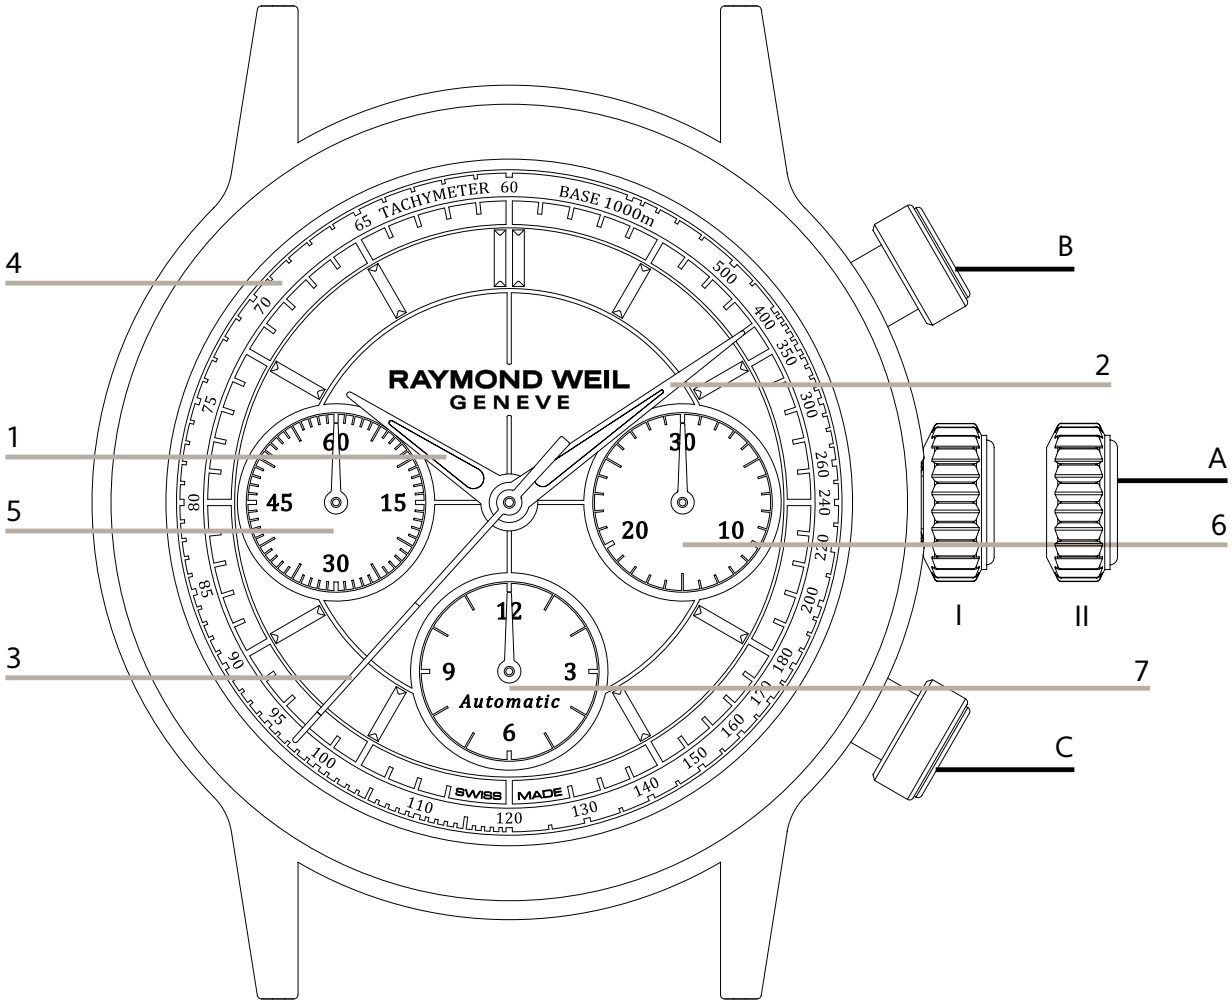
Your RAYMOND WEIL watch was hand-assembled by our watchmakers according to the most rigorous quality standards of the Swiss watch industry.

In order to guarantee that your RAYMOND WEIL watch will function perfectly for many years to come, please pay close attention to the advice contained in these instructions for use as well as in the international guarantee.

Your watch has a manual-winding mechanical movement with tri-compax chronograph and it has a running reserve of 62 hours.

Note: if your watch has stopped, before any adjustment it is necessary to wind it manually by turning the 3 pm crown clockwise 20 - 30 times. When you wear the watch, it will wind automatically with the natural movements of your wrist.

SELF-WINDING MECHANICAL WATCH



1. Hour hand

2. Minute hand

3. Second hand

4. Tachymeter

5. Chronograph's second hand

6. Chronograph's minute hand

7. Chronograph's hours hand

A. Crown

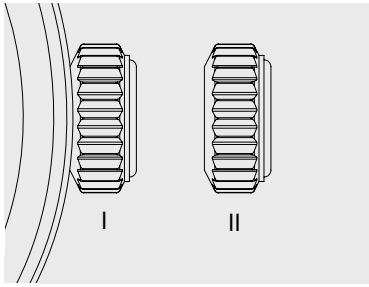
I. Normal, winding position

II. Pulled out, time-setting position

B. Chronograph push-button Start/Stop

C. Chronograph push-button Reset

THE CROWN HAS TWO DIFFERENT POSITIONS.



I. Normal, winding position

II. Pulled out, time-setting position

I - NORMAL POSITION

The crown is pressed against the case in its normal position, ensuring the water-resistance of the watch.
This position allows the watch to be wound manually.
To fully wind the watch, turn the crown 30 to 40 full rotations.
As the mainspring tightens, the crown will gradually become harder to turn.
Do not force the crown at the end of winding, as this could damage the movement.

II - TIME SETTING POSITION

The crown is pulled out.
This position enables the time display to be adjusted by turning in the winding direction.
After adjustment, return the crown to position I, against the case to ensure the water resistance of the watch.
After setting the time, always return the crown to initial position to restart the hands and to maintain your watch's water-resistance.

3

To activate the chronograph function, the pusher (B) located at 2 pm and the pusher (C) located at 4 pm need to be used in the order detailed below:

1. START

Press push-button (B) at 2 pm to activate the seconds hand of the chronograph. If the timed activity lasts longer than 60 seconds, the time elapsed will next appear on the minutes counter.

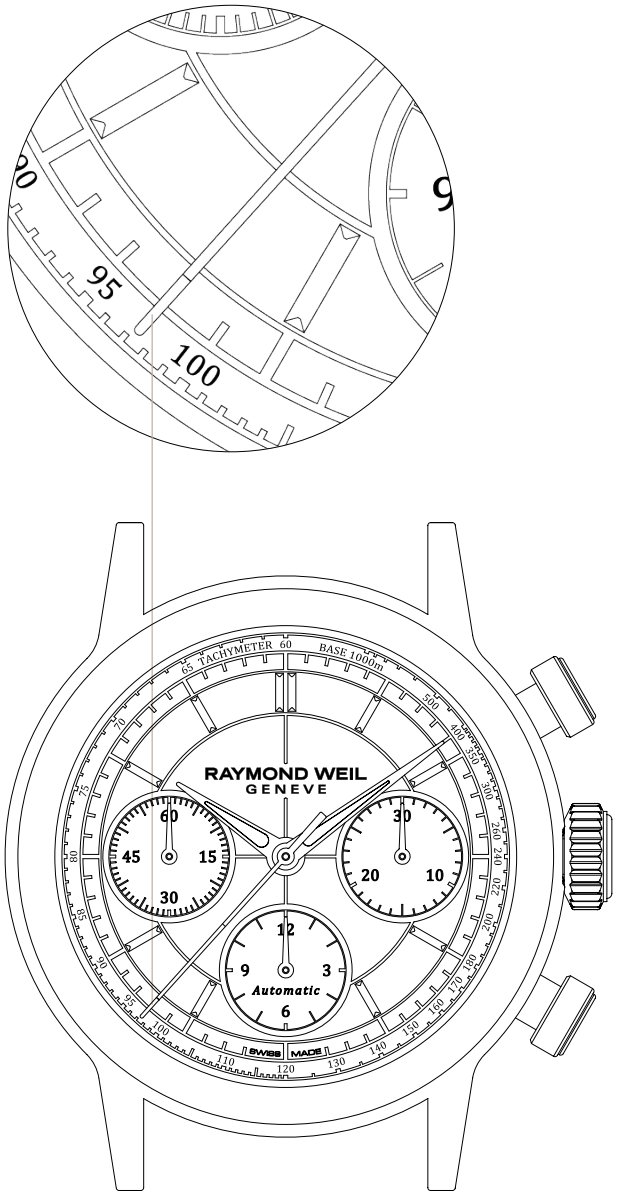
2. STOP

Press push-button (B) a second time to stop the chronograph and obtain the time that has elapsed (in minutes and seconds). By pressing push-button (B) again, timing restarts immediately. Thus you can measure several consecutive time-durations.

3. RESETTING TO ZERO

Only after stopping the chronograph by pressing push-button (B), press push-button (C) to reset all chronograph counters to zero. Your watch is now ready to start timing again.

USE OF THE TACHYMETER



The tachymeter scale is used to calculate the speed in km/h, by measuring the time needed to cover 1 km.

I

Measure the time needed to cover 1 km using the chronograph function.

II

Read the speed in km/h on the tachometer, at the point indicated by the chronograph seconds hand.
E.g.: If we cover 1 km in 37s, then we have travelled at 97 km/h.

WATCH CARE

WE INVITE YOU TO FOLLOW THE RECOMMENDATIONS BELOW TO ENSURE THE PERFECT PERFORMANCE AND CARE OF YOUR WATCH

IMPORTANT PRECAUTIONS

The Valjoux 23-6 is robust but vintage:

- avoid resetting while the watch is running
- avoid shocks while the chronograph is running
- never test the pushers underwater

CROWN

Always push the crown back into the case (position I) to prevent water from entering the mechanism. Do not operate the crown under water.

MAGNETIC FIELDS

Avoid contact with magnets, or putting your watch on top of loudspeakers, refrigerators or magnetic cases for iPads or other tablets. These devices generate powerful magnetic fields that can affect the accuracy of your watch.

WATER RESISTANCE

Respect the water resistance limit and always rinse your watch with fresh water after swimming.

SHOCKS

Whether physical, thermal or other, avoid them.

CLEANING

For metal bracelets, rubber straps and water-resistant cases, use a toothbrush and soapy water for cleaning and dry with a soft cloth.

LEATHER STRAP

Avoid contact with water, dampness, greasy substances and cosmetic products to prevent discolouration and deformation. Avoid prolonged exposure to sunlight to prevent the colour from fading.

CHEMICAL PRODUCTS

Avoid direct contact with solvents, detergents, perfumes, cosmetics, insect repellents, etc., since they may damage the bracelet, case or gaskets.

TEMPERATURE

Avoid exposure to extreme temperatures (greater than 60°C, or 140°F, less than 0°C, or 32°F) or extreme temperature changes.

SERVICING REQUIREMENTS

To ensure reliable performance your watch should be serviced at least every three years.

WARRANTY

The watch RAYMOND WEIL is warranted for two years from the date of purchase. This limited warranty is valid provided that your RAYMOND WEIL watch was sold by an authorised RAYMOND WEIL dealer and that the warranty card (Limited Warranty Card/Guarantee Card) was fully and properly fulfilled by the latter.

This limited warranty covers the defects in material or resulting from manufacturing of the watch.

Are excluded from this limited warranty of the manufacturer:

- Battery, crystal, strap;
- Damage resulting from an accident, normal wear, negligence, misuse, abuse or from the intervention of any person not authorised by RAYMOND WEIL S.A. or its representatives;
- Loss and theft;

Incidental or consequential damage arising from the failure or malfunction of the watch as well as from any inappropriate usage, lack of precision, malfunction or lack of conformity of the watch.

In case of defects covered by this limited warranty, your watch will be, at the sole option of RAYMOND WEIL S.A., repaired or replaced free of charge. This is the sole obligation of RAYMOND WEIL S.A. resulting from this limited warranty and any implied warranties. The dealer is sole responsible for any other warranties it may have granted.

The warranty becomes void in the event that any person not duly authorised by RAYMOND WEIL S.A. or its representatives attempts to repair the claimed defect.

Should you require work under this warranty, please send your watch by insured mail and in a carefully wrapped package to one of the approved after-sales-service centres, or that you take it directly to an approved RAYMOND WEIL dealer. The watch must be accompanied by the duly completed warranty card and purchase receipt.

RAYMOND WEIL offers an extra year's guarantee to its watch owners when they register with the RW Club. The RW Club 3rd year guarantee extension is for a duration of one year in addition to and in the continuity of the RAYMOND WEIL standard two year International guarantee policy and is applicable to all watches bought from May 1st 2013.

UNDER NO CIRCUMSTANCES WILL RAYMOND WEIL S.A. BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL, SPECIAL OR OTHER DAMAGES.

THE DURATION OF ANY WARRANTIES IMPLIED BY LAW (INCLUDING THE IMPLIED WARRANTY OF MERCHANTABILITY) ARE LIMITED TO THE TWO-YEARS DURATION OF THIS WARRANTY.

The above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from State to State.

EXTENDED WARRANTY

RAYMOND WEIL offers an extra year's guarantee to its watch owners when they register with the WEIL Club. Learn more about the WEIL Club here

Follow the steps below to register your watch with the WEIL Club and receive your extended 3-Year Warranty certificate.
